About This File

This placeholder keeps the /documents folder from being empty so the project structure stays complete when pushed to GitHub (Git does not track empty folders), and so the "Download Company Profile" button on the website and in the About section works out of the box instead of showing a broken link.

To replace it with your real company profile:

1. Prepare your official company profile as a PDF file.
2. Name it exactly: rakaiz-company-profile.pdf
3. Replace this file at: public/documents/rakaiz-company-profile.pdf
4. Commit and push to GitHub - Vercel will redeploy automatically.
